Composition per 100 g (laboratory analysis)

No laboratory composition report is available for this species yet. Available on enquiry once tested.

Quality practices and documents

Feed is lab-tested. Fish are sent for laboratory analysis every quarter. Water quality is tested regularly. Feeding and stock are recorded daily for each cage. Our **Farm Compliance File** (procedures, test register and record sheets) and available test reports can be shared on request.

Certification status: ISO 9001, ISO 14001 and HACCP are applied for and in progress. They have not been issued yet. This sheet is a product description, not a certificate. Green Mart is converting to a Private Limited company; this is in process.

Supply and samples

Local supply: Nagpur and surrounding region. For overseas buyers, samples are arranged through a licensed exporter. Tell us your country, product, monthly quantity and preferred presentation, and we will confirm availability and specifications.
